

27 OCT 1978

MEMORANDUM FOR: Deputy Director, National Foreign
Assessment Center

SUBJECT: (A) Request to Speak Before Groups
of Science and Engineering
Students at University of Utah,
the University of Mississippi
and Memphis State University

(B) Request to Participate with a CIA
Recruiter in a Discussion with
the Rotary Club of Oxford,
Mississippi

STATINTL

1. Mr. [REDACTED] a CIA recruiter, has requested that I be with him on 7 November at the University of Utah to interview science and engineering students. He also requested that I speak to the student chapter of the IEEE. The subject would be "CIA's Need for Scientists and Engineers to Collect, Process and Analyze Intelligence Information." Of course the entire discussion will be unclassified. I presented a comparable talk to a comparable group of students at Brigham Young University last November.

STATINTL

2. Mr. [REDACTED] a CIA recruiter, has requested that I be with him on 21 and 22 November at the University of Mississippi and Memphis State University to interview science and engineering students. He also requested that I speak informally to certain faculty members and a small number of science and engineering students at the University of Mississippi. My discussion here would be less formal than the one at the University of Utah but would basically include the same material. It is possible that Bill will want me to hold a similar informal discussion at Memphis State University.

SUBJECT: (A) Request to Speak Before Groups of Science and Engineering Students at University of Utah, the University of Mississippi and Memphis State University

(B) Request to Participate with a CIA Recruiter in a Discussion with the Rotary Club of Oxford, Mississippi

STATINTL

3. [REDACTED] received and after approval from CIA has accepted an invitation to speak to the local Rotary Club of Oxford, Mississippi on 21 November. [REDACTED] has requested that I appear with him before this club and make a few remarks at the end of his talk about the use of scientists and engineers within CIA. [REDACTED] suggested that if I should do this that I should speak for only ten minutes or so. STATINTL
